### Each View Room offers:

- A large veranda with two daybeds and two loungers
- Two double beds
- Cell phone reception, a working desk and comfortable reading chair
- An en-suite bathroom
- A tea/coffee station
- A mini fridge for own use
- Two roof fans
- A security safe
- Private, undercover parking

### Each Standard Room offers:

- A small veranda with two chairs
- Two double beds
- Cell phone reception, a working desk and two chairs
- An en-suite bathroom
- A tea/coffee station
- A mini fridge for own use
- Two roof fans
- A security safe
- Private, undercover parking

## Child Policy:

Children from the age of 3 are allowed.

Please note we offer a child friendly environment, but due to the nature of our activities that focuses on carnivores, certain activities are restricted.

AGE 3 – onwards: AfriCat Carnivore Care & Information Centre

AGE 5 – onwards: AfriCat Carnivore Care & Information Centre, Off The Beaten Track and a short game drive

AGE 6 – onwards: Park Activities, AfriCat Carnivore Care & Information Centre, Off The Beaten Track

AGE 12 – onwards: Park Activities, AfriCat Carnivore Care & Information Centre, Off The Beaten Track, Guided Bush Walks in the Okonjima Nature Reserve

Please Note:

Children need to be supervised by their parents, in and around the lodge and surrounding areas. They are prohibited to swim unaccompanied. Regrettably no “CHILD-MINOR-CARE” is available. Parents will be always responsible for their kids` safety.

## Activities on offer:

The Okonjima Nature Reserve sprawls over 200 square kilometres of undulating plains, mountainous outcrops, and riverine thickets, and it is here that leopard (*Panthera pardus*), the most adaptable of all the wild cats, thrive.

These intelligent, solitary predators occur in high density in the expanse of Okonjima Nature Reserve’s multi-faceted topography. The Reserve’s predator research programme has spanned three decades, and its findings have provided great insight to leopard behavioural patterns as well as offered an upbeat prognosis for a sustainable future for the species in today’s Africa.

A two-day Okonjima stay offers the best chance to view wild leopard in Namibia, as well as those collared for research purposes, in their natural habitats. Research programme leopard are actively tracked, and their collars are an invaluable resource for locating, and then returning to the Reserve, cats which have migrated to surrounding farmland where they are perceived as threats to livestock.

The Okonjima Nature Reserve, a huge, protected area set amongst the rugged commercial farmlands of central Namibia, comprises a diversified ecosystem representative of both the larger and small mammals of Namibia, as well as most of the country’s endemic birds.

Game drives and guided bush walks offer visitors an intimate, up-close perspective of Namibia’s wildlife and, especially, its most protected species.

The Okonjima Nature Reserve is home to and runs extensive research projects on rare and endangered species, big and small. Okonjima is a malaria-free area.

Okonjima is situated half-way between Windhoek and Etosha National Park (10 km off the B1)
